PROFILE SUMMARY

Full Stack Developer with 6+ years of experience in designing, developing, and maintaining scalable web and mobile applications. Proficient in both frontend and backend technologies, with a strong focus on JavaScript frameworks such as React.js and Node.js. Skilled in database management, API development, and agile project management. Demonstrate a proven ability to deliver high-quality technology solutions that meet client requirements and drive business growth.

TECHNICAL SKILLS

Programming Languages and Frameworks: JavaScript, Python, PHP, Solidity, React.js, Node.js, Redux, HTML5, CSS3/SASS, SpringBoot

Databases: MySQL, MariaDB, MongoDB, Postgres, SQL

Web API Development and Integration: REST API, Spring Framework

Version Control: Git, GitHub

Project Management Tools: Jira, Trello, Pivotal Tracker

Other skills: Software Development Life Cycle, Object Oriented Programming (OOP), Agile Methodologies, Application Performance and Testing, Continuous Deployment

WORK EXPERIENCE

Full Stack Developer

Mission | Quebec, Canada (Remote)

August 2023 – Present

- Develop and maintain server-side logic and APIs to facilitate seamless integration with front-end functionalities.
- Collaborate with cross-functional teams across diverse geographies to design and implement efficient database solutions for data storage and retrieval.
- Implement robust security measures to safeguard sensitive data and applications against potential threats.
- Continuously optimize server performance and scalability to enhance system efficiency and accommodate growing user demands, improving the user experience.
- Stay updated with emerging technologies and best practices to enhance development processes and deliver high-quality solutions.

Technologies used: JavaScript, TypeScript, Node.js, React.js

Senior Frontend Developer (React)

CodeMentor.io | California, United States (Remote)

December 2020 – Present

- Spearheaded the development of cutting-edge web and mobile applications for clients worldwide, driving innovation and delivering exceptional technology solutions.
- Played a key role in enhancing user experience by implementing intuitive user interfaces and interactive features, resulting in increased user engagement and satisfaction.
- Leveraged expertise in React framework to architect and implement scalable and responsive frontend solutions, enhancing product performance, scalability, and maintainability.
- Collaborated with global cross-functional teams to analyze requirements, provide technical expertise, and deliver solutions aligned with client objectives and industry best practices.
- Troubleshoot and resolved complex technical issues, which ensured seamless functionality of frontend applications across various platforms and devices.
- Contributed to code reviews, providing valuable insights and feedback to maintain code quality and promote continuous improvement within the development team.
- Cultivated strong client relationships through effective communication, proactive problem-solving, and consistently exceeding expectations in project delivery.
- Demonstrated strong leadership and teamwork skills, providing mentorship to junior developers, effectively prioritizing tasks, and coordinating efforts to meet project deadlines and deliverables.

Technologies used: Java (Springboot Framework), JavaScript, Node.js, Solidity, React.js, Solid.js, Jira

Solidity and Smart Contract Developer (Mentor)

GROWIC | Remote

June 2022 – May 2023

- Suggested and implemented innovative features such as quizzes and assignments that enhanced user experience and learning outcomes within smart contracts on the GROWIC platform.
- Collaborated with cross-functional teams to brainstorm, plan, and execute feature implementations, demonstrating strong teamwork and communication skills.
- Leveraged expertise in blockchain technology to provide mentorship and guidance to learners, ensuring a deep understanding of Solidity programming and smart contract development.
- Acted as a subject matter expert on Solidity and smart contract development, providing valuable insights and best practices to learners seeking to advance their skills in blockchain technology.
- Received positive feedback from learners on the effectiveness and relevance of feature enhancements, contributing to the platform's reputation as a leading educational resource in blockchain development.

Technologies used: React.js, JavaScript, Solidity

Web and Mobile Application Developer

Systems Technologies Limited | Remote

January 2020 – August 2020

- Designed and developed innovative web and mobile applications, leveraging React Native, React.js, and Node.js to craft detailed mockups and prototypes, which enhanced user experiences and increased client satisfaction.
- Utilized the React framework to create visually appealing and highly responsive user interfaces for frontend development, leading to improved usability and engagement.
- Implemented efficient continuous deployment strategies and established robust Git workflows for React.js web applications, ensuring seamless collaboration among team members and streamlined project delivery.
- Played a pivotal role in creating and maintaining APIs, facilitating smooth communication between various components of the applications and enabling seamless integration with external systems.
- Managed project tasks and timelines using project management tools such as Trello and Pivotal Tracker, ensuring efficient project execution and delivery within stipulated timelines.

Technologies used: React.js, Node.js, React Native, GitHub, Trello, Pivotal Tracker

Web/Mobile Developer

Cizar Consult

June 2017 – January 2020

- Led the development and architectural design of numerous high-traffic e-commerce websites for clients, elevating user engagement and driving revenue growth.
- Engineered and implemented internal systems including order management tools, revenue reporting mechanisms, and production workflow trackers, optimizing operational efficiency.
- Crafted custom REST APIs utilizing PHP and Node.js that facilitated seamless communication between various components of web applications.
- Innovated resource configuration and allocation strategies to streamline server traffic, ensuring optimal performance even under heavy loads.
- Designed and executed dynamic and interactive websites, enhancing user experience and bolstering traffic and page views.
- Utilized project management tools such as Trello and Pivotal Tracker to effectively monitor and manage projects, ensuring timely delivery and alignment with stakeholders' expectations.

Technologies used: JavaScript, PHP, React.js, Node.js, HTML5, CSS3/SASS, MySQL

EDUCATION

Federal University of Technology, Minna

BEng Civil Engineering

CERTIFICATION/TRAINING

Project Management (PMP) | PMI

June 2024

Microsoft Certified Azure Fundamentals | Microsoft

February 2023

Blockchain Developer | Binance Africa Masterclass

May 2021

Node.js: Security | LinkedIn Learning

March 2020
